CLEENOL GROUP LTD

PRODUCT USE GUIDE FOR

HI-POWER EFFERVESCENT CHLORINE TABLETS

Product Description

Chlorine bleach based disinfectant tablets. More convenient and safer to use than traditional liquid hypochlorite bleach. One or two tablets in a bucket of water dissolves with an effervescent action to give a solution of ready to use bleach. The active constituent is dichloroiscyanurate. Each tablet yields 200 ppm of available chlorine when placed in 5 litres of cold water.

Product Features

- Fast dissolving, highly convenient and a more accurate and safe alternative to liquid bleach.
- Effective for general disinfecting clean non-absorbent surfaces, food preparation areas, drains, sinks, etc. and blood spillages.
- Can be used against HIV (Aids) and hepatitis B virus.
- Compatible with neutral detergents for making a one stage cleaning and sanitizing solution.

Directions for Use

- Each chlorine tablet gives 1000ppm of chlorine in 1 litre of water. For food preparation areas, equipment and utensils - 200ppm. For drains, toilets, etc - 400ppm. For general disinfection - 1000ppm. For blood spillages - 10,000ppm.
- To sanitize vegetables and salads - dilute 1 tablet per 40 litres of cold water. Immerse salad in solution for minimum 15 minutes. If salad is not to be consumed within 24 hours, use 2 tablets in 40 litres cold water.
- Do not allow solution to fall below 20ppm available chlorine, either by regularly replacing with fresh solution every 3-4 hours or by testing the chlorine levels regularly. Testing strips (Code PT631) and other testing equipment are available from Palintest Ltd. Tel: 0191 4910808 (www.palintest.com).

Shelf Life

- The tablets have a shelf life in excess of 3 years provided containers are unopened. However, they must be used within 6 months of opening and the cap must be securely tightened after use.

Environmental Hazards

- Biodegradable. Not likely to present a hazard to the environment. However, large quantities should not be allowed to enter waterways in concentrated form.

Packaging

6 x 200

Code No. 0625CHL/6

Data Sheet No P7

Note: This product is only to be used for the purpose for which it was intended and in accordance with the specified instructions. This product should never be mixed with other chemical products and should be handled with care and stored carefully out of reach of children.
